The National Weather Service will train new and veteran spotters, including interested tribal members, citizens, amateur radio, CERT, citizen corps, and law enforcement staff, on how to look for and report significant weather events. Training includes video demonstrations. Spotters are needed, particularly in rural parts of Grays Harbor County, as well as those who have weather instrumentation, such as an anemometer.

If planning to attend this spotter training session, please RSVP so an appropriate number of handout materials can be on hand. Class capacity is 50, so sign up early! We look forward to seeing you at this or other Skywarn Weather Spotter training sessions, and receiving your hazardous weather reports.
